Art Unit: 2613

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Miremadi (US Patent Application Publication No: 2004/0131094 A1).

Regarding claim 1, Miremadi teaches an optical transmitter (fig. 3), comprising: a light emitting element (10, fig. 3) that outputs signal light (18, fig. 3) subjected to light intensity modulation (page 2, paragraph 0011, lines 6-7); and a control unit (Controller, fig. 3) that increases an average optical output (page 2, paragraph 0012, page 3, paragraph 0023, lines 7-11) of the light emitting element (10, fig. 3) when the environmental temperature in the vicinity of the light emitting element increases (page 1, paragraph 0007, lines 14-15, page 2, paragraph 0012, lines 9-14, page 3, paragraph 0023, lines 14-16).

Regarding claims 2-3, Miremadi further teaches the control unit (Controller, fig. 3) controls the average driving current in accordance with the environmental temperature in the vicinity of the light emitting element and the average optical output of the light emitting element (page 3, paragraph 0023).

Regarding claim 4, Miremadi further teaches the control unit (Controller, fig. 3) controls the average driving current based on only the data corresponding to the environmental temperature in the vicinity of the light emitting element (page 2, paragraph 0012).

Application/Control Number: 10/596,893 Page 3

Art Unit: 2613

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to M. R. Sedighian whose telephone number is (571) 272-3034. The examiner can normally be reached on 9 to 5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jason Chan can be reached on (571) 272-3022. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.

/M. R. Sedighian/ Primary Examiner, Art Unit 2613
